

Evacuation Body Splint – EVAC

Lightweight, versatile and easy to store, carry and use, Saferight's evacuation body splint is used around the world for horizontal, vertical and confined space rescue. Weighing 6kg, it comes in its own carry bag with shoulder straps, and is manufactured from heavy duty PVC with neutral buoyancy. The body stretcher does not contain any metal parts, enabling the casualty to remain in the splint during the X Ray.

Key Features

- Roll up design for easy storage
- Lightweight and compact
- Can be used for horizontal, vertical and confined space rescues
- No metal components
- Neutrally buoyant
- 200cm long by 85cm wide at widest point
