

Rope Access Harness – H12RA

The Rope Access Harness is the first of a new range of purpose made harnesses developed specifically with Rope Access in mind. It features a sewn-in chest ascender strap to support the ascender as well as ventilated fabric that offers the wearer greater comfort when suspended in a harness for long periods, whether ascending, descending or aid climbing.

This harness is manufactured in excess of the requirement of AS/NZS 1891.1.

Although developed for Rope Access, this harness is suitable for Tower Climbers, Riggers and Rescue Services.
