

## Recovery Reels - IRR

Saferight markets and distributes the IKAR range of inertia reels in Australasia. The reels are renowned worldwide for their robust design and engineering excellence.

Recovery reels are used in confined space applications to provide primary or secondary means of access and egress. In addition to the inertia reel, they have a winch element allowing a second person to lower or raise the worker attached to the reel.

### Key Features

- Range in lengths from 14m to 42m
- Galvanised cable
- Locks off immediately in the event of a fall, reducing forces generated as free fall distance is reduced
- Winch enables recover of worker from confined spaces
- Rated for one person

### Materials & Construction

- Galvanised cable
- Aluminum casing
- Steel double action hook, triple action karabiner or swivel triple action karabiner (optional extra)

### Testing & Quality Control

- CE marked and certified to EN360
- Conforms to AS/NZS 1891.3
- Servicing requirements in accordance with AS/NZS 1891.3 and 1891.4

### Options

CODE	LENGTH	DESCRIPTION
IR15R	15m	Triple Action Swivel Karabiner
IR25R	25m	Triple Action Swivel Karabiner
KR42R	42m	Triple Action Swivel Karabiner

### Servicing Requirements

It is a requirement of AS/NZS 1891.4 and the manufacturer's recommendation that all inertia reels must be serviced on an annual basis by the manufacturer's authorised servicing agent. Failure to maintain annual servicing requirements voids the manufacturer's warranty and is a breach of an employers' duty of care.

Inertia reels can require different levels of servicing depending upon annual usage and parts. Saferight offers a contract which includes a basic service in accordance with AS/NZS 1891.4 every 12 months for the duration of the contract. Should any replacement parts be required, you will be sent a quotation for approval before the additional works are carried out.
