

# Rapid Response Kit – RR

Rapid response kits should be available on all sites where people are working at height or in a confined space where somebody may require rescue after a fall in a harness.

All users should be trained in their operation, as rapid rescue after a fall is an extremely important consideration due to the possible effects of suspension trauma caused by hanging in a harness. The kits are supplied pre-rigged with a figure 8 knot on one end.

## Key Features

- Rope Bag (Backpack style)
